& Complete Platform Guide

STATUS

VERSION 1.0

Bridging Agribusiness Potential & Financial Technology

THE SUPPLY CHAIN

Agribusiness supports a complex, real-economy supply chain that begins at the farm gate and extends through every stage of value creation to final consumption.

Production

Technology

Storage

Processing

Logistics

Distribution

AgriCorp provides a digital ecosystem connecting these essential real-economy assets with modern capital infrastructure.

Explore agribusiness-related opportunities & transparent plans

Monitor account activity & financial records via a digital dashboard

Diverse payment methods including Fiat & Cryptocurrencies

Participate in a global referral and affiliate network

Seamless remote access for information & management

THE AGRICORP FORMULA

Agribusiness + Technology + Management + Connectivity + Vision

FROM THE FARM TO THE DIGITAL WORLD

Decades of Agricultural Roots Evolving Through Technology

1985

Agrivorp states that its company history became associated with agricultural activities, farming, and rural property management.

2010

Agrivorp states that this experience began transitioning into a digital environment through the development of an online platform.

TODAY

The model integrates agricultural experience, technology, management, and digital infrastructure to support a global community.

“ Our story began in the fields. Our evolution happened through technology. Our vision is **focused on the future.** ”

Transforming Agricultural Potential Through Technology

MISSION

Our Purpose

Transforming the potential of agriculture into opportunities through technology.

VISION

Our Direction

To become a global reference in technology applied to agribusiness.

AGRIBUSINESS ECOSYSTEM

Land

Production

Technology

Processing

Logistics

Distribution

Market

FIVE STRATEGIC PILLARS

Global Leadership

Establishing a recognized presence across international agribusiness markets.

Scalable Growth

Building infrastructure and networks designed to expand efficiently over time.

Innovation

Applying digital tools, data, and technology to agricultural investment access.

Sustainable Impact

Aligning platform activity with long-term environmental and economic responsibility.

Enduring Legacy

Building lasting value through decades of agricultural and technological expertise.

What Is Agrivorp?

A Digital Platform Connected to the Agribusiness Sector

The Access Layer

Agrivorp is presented as a digital environment offering plan information and activity-monitoring tools through a simplified user experience, bridging the gap between capital and the agricultural supply chain.

INSTITUTIONAL FRAMING

The platform serves as the digital access layer; official terms, counterparties, legal structure, and regulatory status of each plan must be reviewed independently.

User Registration

Creation of personal accounts and secure profile management.

01

Plan Exploration

Detailed review and selection of available agribusiness plans.

02

Transaction History

Comprehensive logs of financial activity and plan status.

03

Payment Methods

Integration of PIX, Credit Cards, and major cryptocurrencies.

04

Affiliate Network

Three-level referral structure for community-driven expansion.

05

Activity Monitoring

Real-time dashboard for tracking results and commissions.

06

Why Agribusiness Matters[🌱]

One of the world's most essential economic systems

Strategic Economic Rationale

The world must continue producing food, which sustains demand for production, land, efficiency, and innovation. Agribusiness is connected to fundamental needs and real-economy activities.

Sustains global food, grain, and protein supply chains

Provides essential fibers, raw materials, and biofuels

Drives demand for advanced production technology

Critical infrastructure: storage, logistics, and distribution

THE REAL-ECONOMY SUPPLY CHAIN

Scale, Investor Challenge & Diversification

Navigating complexity through strategic agricultural integration

SECTOR SCALE

\$270B – \$540B

Annual U.S. Agricultural Output

Roughly 1% to 2% of U.S. GDP. Company-provided, methodology-dependent estimate requiring independent verification.

“Essential scale does not eliminate investment complexity. Strategic diversification is the key to resilience.”

The objective is not to select only one asset category, but to build a robust portfolio across the real economy.

INVESTOR CHALLENGES ———

Inflationary Pressure

Counteracting idle cash erosion.

Yield Scarcity

Low returns on traditional fixed-income products.

Access Barriers

Complexity of direct agribusiness entry.

Concentration Risk

Wealth anchored in volatile single sectors.

Tech Complexity

Difficulty managing modern digital ag-assets.

Global Reach

Difficulty scaling investments across borders.

DIVERSIFICATION UNIVERSE ———

Bank Accounts

Fixed Income

Treasuries

Public Stocks

Private Funds

Real Estate

Commodities

Agribusiness

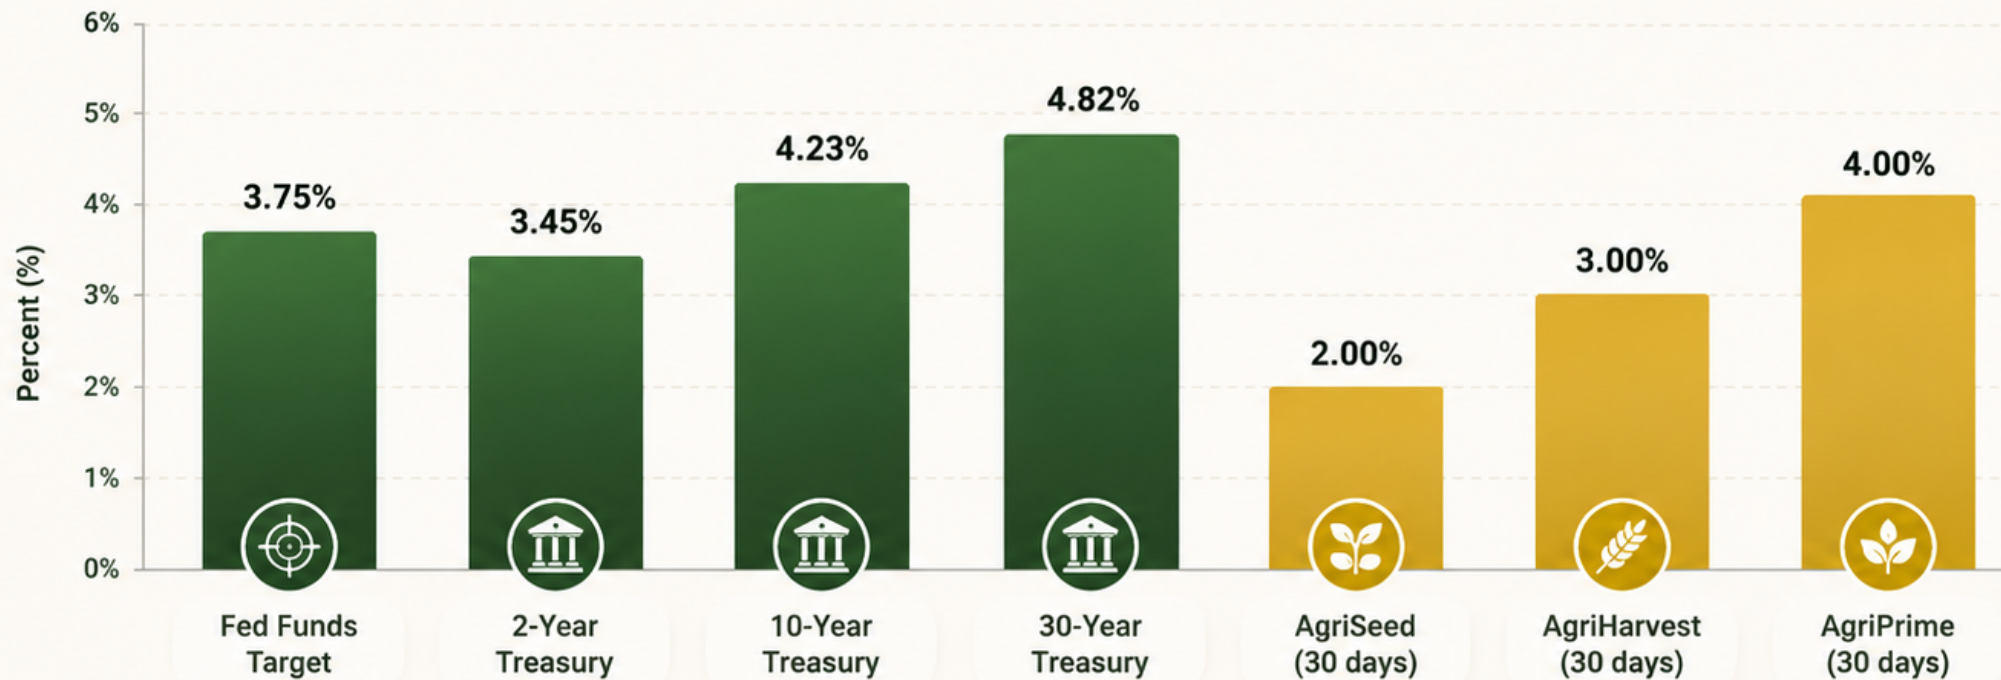

Digital Assets

Current Benchmark Context[🌱]

Market yields vs. Agrivorp stated plan percentages

Treasury yields are market benchmarks. Agrivorp plan percentages are company-stated terms and are not directly comparable without reviewing liquidity, credit, and operational risks. Data as of July 29 – August 5, 2026.

The New Era of Agriculture¹

Advancing efficiency through digital monitoring and precision analytics

CORE TECHNOLOGIES —

Drones & Satellites

Aerial intelligence for real-time field insights.

Sensors & Climate

Environmental monitoring for better decision-making.

AI & Big Data

Turning data into actionable insights.

Precision Agriculture

Targeted solutions for optimal resource use.

Automation Systems

Streamlining operations from planting to harvest.

Productivity Analytics

Measuring performance to drive continuous improvement.

FUTURE-STATE ATTRIBUTES

DIGITAL

AUTOMATED

DATA-DRIVEN

CONNECTED

PRECISE

EFFICIENT

“Agriculture is becoming a high-tech sector, where real field operations are seamlessly integrated with digital monitoring to maximize yield and sustainability.”

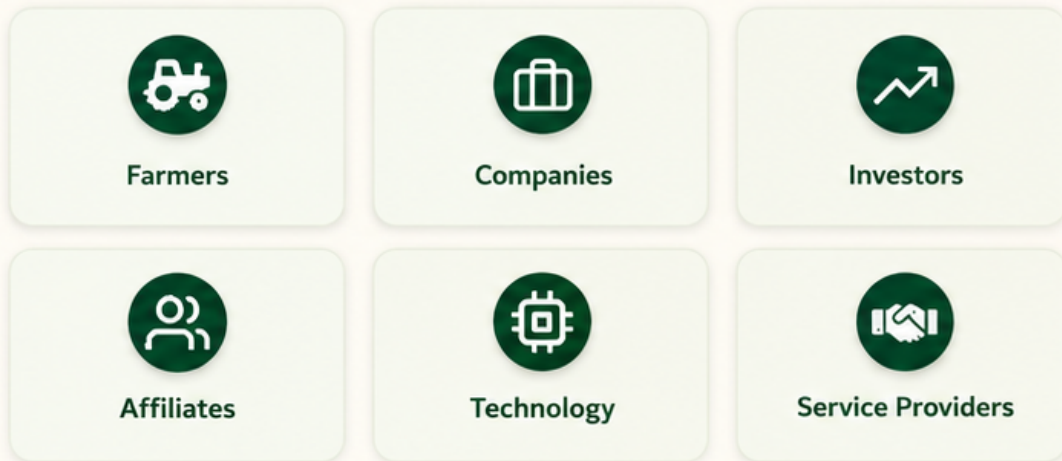

ECOSYSTEM

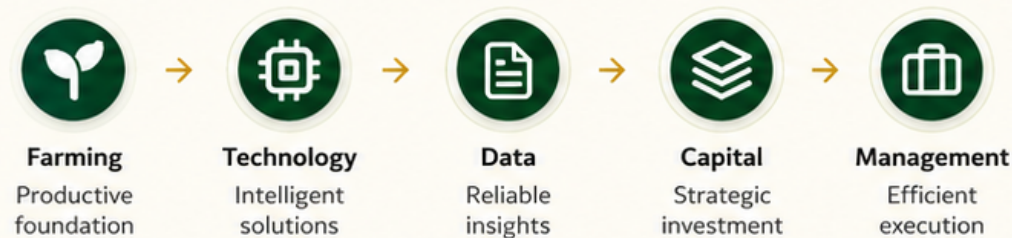

Agrivorp Ecosystem & Differentiation

Integrating farmers, technology, and global capital

ECOSYSTEM PARTICIPANTS

INTEGRATED EXPERIENCE

STATED DIFFERENTIATORS

- Experience**: Leveraging roots in agricultural management since 1985.
- Technology**: Proprietary digital platform for activity monitoring.
- Accessibility**: Simplified entry to diverse agribusiness-related plans.
- Connectivity**: Linking global participants to real-economy supply chains.
- Long-Term Vision**: Focus on sustainable impact and enduring legacy.

COMMITMENT THEMES

- Transparency**: Icon of a shield.
- Management**: Icon of two stylized human figures.
- Responsibility**: Icon of a hand holding a seedling.
- Innovation**: Icon of a lightbulb.
- Sustainability**: Icon of a leaf.
- Global Scalability**: Icon of a globe.

Agrivorp Plans Comparison

Standardized investment tiers based on company-stated terms

AGRISEED

2% Stated

CONTRIBUTION RANGE
US\$ 98 — US\$ 16,000

STATED RETURN PERIOD
30 Days

NUMBER OF RETURNS
24 Installments

TOTAL PLAN TERM
24 Months

AGRIHARVEST

3% Stated

CONTRIBUTION RANGE
US\$ 20,000 — US\$ 80,000

STATED RETURN PERIOD
30 Days

24 Months

AGRIPRIME

4% Stated

CONTRIBUTION RANGE
US\$ 90,000 — US\$ 1M

STATED RETURN PERIOD
30 Days

NUMBER OF RETURNS
24 Installments

TOTAL PLAN TERM
24 Months

Decision guidance: Plans should be evaluated based on financial capacity, objectives, time horizon, and risk tolerance.

Invest. Grow. Sustain.

How the Website Works

A guided eight-step digital journey

1

Registration

Create your secure institutional account to access the platform.

2

Dashboard

Access your personalized command center for all account activities.

3

Explore Plans

Review available tiers, contribution ranges, and stated terms.

4

Selection

Choose the specific plan that aligns with your financial objectives.

5

Payment

Select from available methods including PIX, Card, or Crypto.

6

Confirmation

Final review of transaction details before secure confirmation.

7

Monitoring

Real-time tracking of account activity and plan information.

8

History

Audit and review all historical records and transaction data.

Secure. Transparent. Built for Growth.

Every step is designed to give you confidence and clarity.

Invest. Grow. Sustain.

Dashboard & Payment Methods

Account monitoring modules and supported payment methods

DASHBOARD MODULES

Balance

Current account balance overview

Investments & Plans

Security & Access

Authentication and account controls

COMPANY-STATED PAYMENT METHODS

PIX

Instant digital payment transfer system

Instant

Credit Card

Standard card processing via payment processor

Card

Bitcoin (BTC)

Peer-to-peer cryptocurrency network

Crypto

USDT & USDC

USD-pegged stablecoins on supported networks

Stablecoin

Ethereum (ETH)

Smart-contract blockchain network token

Crypto

BNB

Binance network native digital asset

Crypto

Protection Boundaries & Security

Clarification of FDIC insurance limits and platform conditions

FDIC Protection Framework

US\$250,000

Standard Maximum Insurance Amount (SMIA)

Generally insures eligible deposits at participating FDIC-insured banks per depositor, per insured bank, per ownership category.

CRITICAL BOUNDARY

FDIC insurance does not automatically cover an investment made through Agrivorp. Coverage is strictly dependent on eligible deposit status at insured institutions and specific recordkeeping requirements.

AGRIVORP INSTITUTIONAL THEMES

Security

Robust systems and data protection protocols

Transparency

Clear disclosures and open communication

Compliance

Regulatory adherence and risk controls

Management

Strong governance and operational oversight

Global Vision

Sustainable growth and long-term value

Affiliate Program

Three-level stated referral structure & commission framework

LEVEL 1

5%

Direct Referrals

Commissions on eligible activity from immediate invitees.

LEVEL 2

2%

Indirect Referrals

Rewards for growth generated by your Level 1 network.

LEVEL 3

1%

Network Expansion

Additional benefit for deep ecosystem development.

Illustrative Mathematical Examples

Level 1 (US\$10,000 Volume) **US\$500**

Level 2 (US\$50,000 Volume) **US\$1,000**

Level 3 (US\$50,000 Volume) **US\$500**

Total Potential Commission **Up to 8% Stated**

IMPORTANT NOTICE ON COMMISSIONS

These figures are strictly mathematical illustrations, not income promises, expected earnings, or guaranteed results. Eligibility and terms must be confirmed in Agrivorp's official program terms.

Affiliate Workflow & Network Example

Strategic network expansion & commission logic

THE AFFILIATE JOURNEY

- 01  Create an Agrivorp account
- 02  Access the dedicated Affiliate Area
- 03  Copy your unique referral link
- 04  Share the link with your network
- 05  New users register through the link
- 06  Eligible investments generate commissions
- 07  Monitor network growth via Dashboard

MATHEMATICAL ILLUSTRATION

REFERRAL LEVEL	VOLUME	RATE	COMMISSION
Level 1 (Direct)	US\$ 100,000	5%	US\$ 5,000
Level 2 (Indirect)	US\$ 50,000	2%	US\$ 1,000
Level 3 (Expansion)	US\$ 50,000	1%	US\$ 500
Illustrative Total			US\$ 6,500

Strictly mathematical and illustrative, not an income promise, guaranteed result, or expectation of earnings. Eligibility and terms apply.

COMPARATIVE VIEW

Agribusiness vs. Traditional Markets

Different assets carry different return drivers and risks

TRADITIONAL & DIGITAL ASSETS

Fixed Income

Potentially more predictable structure depending on issuer.

RISKS: INTEREST-RATE, INFLATION, CREDIT, REINVESTMENT.

Stocks & Equities

Potential for capital appreciation and dividend income.

RISKS: MARKET VOLATILITY, SECTOR SHIFTS, LIQUIDITY.

Real Estate

Physical-asset exposure; tangible value.

RISKS: HIGH CAPITAL, ONGOING COSTS, LOWER LIQUIDITY.

Crypto Assets

Significant price movement potential; 24/7 markets.

RISKS: HIGH VOLATILITY, CUSTODY, TECHNOLOGY, REGULATORY.

Essential demand does not make an investment risk-free.

AGRIBUSINESS ECOSYSTEM

Connected to essential real-economy supply chains.

Primary Drivers

Fundamental global needs: food, grains, protein, fiber, and biofuels driven by population growth.

Sector-Specific Risks

Weather conditions, pests, diseases, and global commodity price fluctuations.

Strategic Context

A diversification strategy involving essential demand — not necessarily one asset category.

Invest Responsibly

Strategic risk assessment and sector-specific considerations

FINANCIAL & STRATEGIC FACTORS

Capital Exposure: Evaluate the portion of capital at risk and personal risk tolerance.

Time & Liquidity: Match the 24-month term with personal liquidity needs and time horizons.

Diversification: Consider agribusiness as one component of a broader multi-asset portfolio.

Governance: Review documentation, regulatory requirements, and tax implications.

Infrastructure: Assess counterparties, custody arrangements, and payment rails.

SECTOR-SPECIFIC RISKS

Climate & Environment: Vulnerability to drought, excessive rainfall, and extreme weather.

Biological Hazards: Potential impact of pests, diseases, and crop failures on production.

Market Volatility: Fluctuations in global commodity prices and foreign exchange (FX) rates.

Operational Challenges: Risks related to production costs, logistics, and supply chain efficiency.

Regulatory Shift: Changes in agricultural policies, market conditions, and legal frameworks.

DECISION PRINCIPLE

1

Explore

2

Analyze

3

Verify

4

Choose Responsibly

5

Monitor

Strategic Future

Building a connected agricultural investment experience

01

International Expansion

Scaling Agrivorp's footprint into key global markets, leveraging strategic partnerships to enhance platform scalability across the entire agribusiness supply chain.

02

Data & Technology Intelligence

Implementing advanced analytics and AI-driven data management to provide users with deeper insights into agribusiness performance and enhanced transparency.

03

Global Ecosystem Connectivity

Fostering a unified community by bridging the gap between agricultural producers, technology innovators, and long-term capital providers.

"We connect technology, capital, and agribusiness to build opportunities for the future."
